Decision Time

Excellent Fumigation Has a Solid Reputation

You would not eat at a restaurant with a 1-star Google or Yelp rating, would you? Ratings are everything. Choose a company with excellent customer satisfaction, get feedback about experiences from other property owners just like you. Do your due diligence when it comes to finding the right company.

Proper Qualifications

When a company knows how to keep its customers happy, they know what to do when it comes to required paperwork, preparation, managing and licensing employees, arriving on time, thorough inspections, great follow up and dependability. Our employees know what they are doing from a technical standpoint, and they know how to treat our customers. They are not in a hurry to get to the next customer, this allows us to provide short windows of time for appointments, we know you have better things to do than wait around. We hold weekly safety meetings, yearly stewardship training with the makers and distributors of our quality products, and we easily pass annual facility inspections with the Department of Agriculture and Fire Department. Make sure the company you choose meets state regulations and they are fully licensed to practice termite and pest control. Hire a company with employees who are properly qualified.

Excellent Fumigation Hires Employees

We educate and train them and pay for their licensing and continuing education to maintain their licenses and keep them up to date with new regulations. We know them and their families, we trust them, and we treat them well. We care about their health and safety, so we provide benefits such as paid time off for personal matters, vacations, holidays, and jury duty. We provide their health insurance, and of course worker's compensation insurance. Since they are treated well by Excellent Fumigation, they are not in a hurry to leave the company, they stay for the career. Our customers ask for them by name. More importantly since we do not use subcontractors, this means your property will not be mechanics liened if subcontractors are not paid.

Excellent Fumigation uses Termidor SC, the Best Product in the Industry

Termidor SC, manufactured by BASF right here in the United States. It is a termiticide/insecticide used for termite control and prevention. Made with the active ingredient Fipronil, Termidor uses a unique "Transfer Effect" to eliminate termite and ant colonies. Because Termidor is a non-repellent insecticide, termites, ants, and other labelled insects will unknowingly encounter the insecticide and spread it to their nest mates through contact or food sharing, resulting in colony elimination.

Termidor SC can be used for pre- and post-construction termite applications and general pest control, including termite trenching, sub-slab injections, exterior surface spraying, interior wall voids, and structural void applications.

Decision Time

For most people, buying real estate is the most expensive purchase they will ever make. Do not let termites eat your most valuable asset. If you realize you have got an infestation on your hands, get it taken care of as soon as possible. **Before you hire a termite, company ask these important questions**, if they cannot answer questions to your satisfaction, it's time to move on.

- Do you use subcontractors?
 - What kind of product do you use, is there enough active ingredient to adequately achieve 100% kill? (If it is not Termidor SC it is likely to be made in China with less active ingredient.)

When Cost is a Factor

Compare reputation, qualification, employees, products, and safety vs. subcontractors. Naturally, you want to make sure you hire a company that you can trust, a reputable specialist. Take it from us, your money is much better spent on a solution to a problem than a quick fix. We accept cash and checks, and we accept credit cards with a small processing fee.

Begin A Lasting Relationship with Excellent Fumigation

Our termite work typically come with a two-year guarantee. If you live in an area with a nearly constant cycle of termites, it's important to stay on top of termite activity before it gets out of hand. After the guarantee expires, to extend the guarantee the low-cost annual service option might be the best bet for you.
